

Customer Support Guide

Support Channels

- In-app live chat, available 24/7 for order-related issues.
- Phone support, available during business hours for urgent issues (payment disputes, undelivered high-value items).
- Email support for non-urgent inquiries, with a response target of 24-48 hours.

Complaint Handling Process

- Step 1: Customer raises an issue with the order ID and description.
- Step 2: Support agent reviews order history, delivery status, and any prior communication.
- Step 3: Agent proposes a resolution — replacement, return, refund, or voucher compensation.
- Step 4: If unresolved, the case is escalated to a senior support specialist within 24 hours.

Escalation Guidelines

- Cases involving safety issues, fraud, or repeated failed resolutions are escalated immediately to the Trust & Safety team.
- Customers are kept informed of case status at every stage via app notification and email.

Service Standards

- First response time target: under 5 minutes for live chat, under 2 hours for phone queue.
- Customer satisfaction is measured after each resolved case via a short feedback survey.
