

Delivery Guidelines

Delivery Process

- Once an order is confirmed, it is packed by the seller or Daraz warehouse and handed to a courier partner.
- Customers receive tracking updates at each stage: Order Confirmed, Packed, Shipped, Out for Delivery, Delivered.
- A delivery attempt includes a call or SMS to the customer; if unreachable, up to 2 more attempts are made before the order is returned to the seller.

Delivery Locations

- Standard delivery covers all major cities and most rural areas via courier partners.
- Remote areas may have limited courier coverage, in which case delivery may take longer or require pickup from a designated point.

Cash on Delivery (COD)

- COD is available for most products, with a maximum order value limit that may vary by region.
- Customers must have the exact or close amount ready, as couriers may not always carry large amounts of change.

Failed Deliveries

- If a package cannot be delivered after 3 attempts, it is returned to the seller and the customer is notified.
- Repeated failed deliveries on a customer's account may result in COD being disabled for future orders.
