

Refund Procedures

When a Refund Is Issued

- After a returned item is received and inspected by the seller or warehouse and confirmed to meet return eligibility.
- Immediately for orders that were never dispatched or were cancelled before shipping.
- For failed deliveries where the customer already made an online payment.

Refund Methods

- Online payments (card, wallet) are refunded to the original payment method.
- Cash on Delivery (COD) orders are refunded to the customer's Daraz Wallet or via bank transfer, since there is no original payment method to reverse.
- Customers may sometimes be offered a choice between a wallet credit (faster) or original payment method refund (slower).

Refund Process Steps

- Step 1: Returned item arrives at the seller/warehouse and is logged.
- Step 2: Quality check confirms the item matches the return reason.
- Step 3: Refund is approved and initiated to the chosen refund method.
- Step 4: Customer receives a confirmation notification with the refund reference number.
