

Return Eligibility Guidelines

Eligibility Checklist

- The return request must be raised within the applicable return window for that product category.
- The item must be in its original condition, with tags, labels, and packaging intact, unless the return reason is 'damaged' or 'wrong item'.
- Proof of purchase (order ID) is required for every return; returns cannot be processed without it.

Category-Specific Rules

- Mobile phones and laptops: eligible for return only if the defect is confirmed by a technical inspection within the return window.
- Beauty and personal care: only eligible if the seal is unbroken and the product is unused.
- Furniture and large appliances: return requires the item to be repackaged in original packaging; pickup may take 3-5 extra days due to size.

When a Return Is Rejected

- If the item shows signs of use beyond inspection, missing parts, or does not match the reported issue, the return may be rejected and the item shipped back to the customer.
- Customers are notified with a reason whenever a return is rejected, and may appeal through Customer Support.
